Project Title: CAMPUS RESOURCE EXCHANGE NETWORK FOR ACADEMIC RESOURCE SHARING

Module Photographs: (3 photographs –Module Photo, Individual student contribution module work in the project and presentation image)

Project Description: (here you write what you did in this project (contribution) including Model Description)

Project Description

Module 2:

Module Description:

This module provides administrators with a platform to **monitor users, manage marketplace activities, and maintain system security**. It supports **approving, removing, reporting, and resolving** resource listings and user complaints, ensuring the platform remains safe, reliable, and efficient for all users.

Working Principle:

1. The administrator **monitors users and marketplace activities** to identify inappropriate or suspicious activities.
2. Resource listings are **reviewed and approved** before being made available to other users.
3. Administrators can **remove inappropriate listings** and handle **user reports and platform complaints** whenever required.
4. The system can **generate reports and usage statistics** to analyze platform performance and user activities.
